Brass Anchor

Proof of performance

1. Applications

- For secondary attachments inside and outside
- For the attachment of components to concrete and solid brick
- For spaced mounting in conjunction with a threaded rod

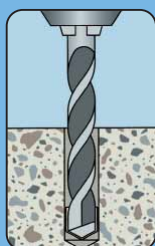

2. Advantages

- Minimal anchoring depth
- Minimum edge clearances and axle bases
- Suitable for through-bolt and cotter-pin mounting
- Can be used without a setting tool
- Economical attachment for outside

3. Properties

- Brass anchor with inside thread
- Knurled surface for secure hold
- Screwing in a screw/threaded rod with a metric thread causes the anchor to expand and anchor itself in the attachment surface
- Corrosion-resistant

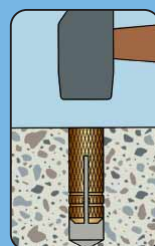

Setting instructions

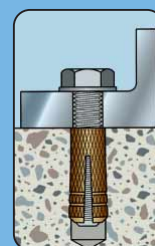

Drill hole

Clean drilled hole

Drive in anchor until flush

Mount component
