

94 Securing Sleeve

Galvanized steel, yellow chromated

ORSY

Proof of performance

1. Applications

- For secondary attachments in interior finishing
- Outdoors, for secondary attachments required only for a short period, e.g. construction safeguards
- Can be used in concrete $\geq B25$, solid brick, solid sand-lime brick, pressure-resistant natural stone

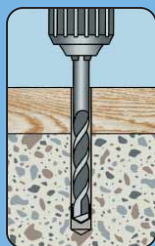

2. Advantages

- Fast, simple installation
- The component is held by the collar
- Can be loaded immediately
- For use in through-bolt mounting
- Better temperature characteristics than polyamide pegs

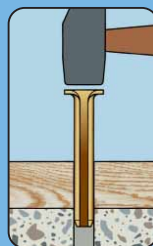

3. Properties

- Tempered spring steel
- Surface galv., yellow chromated

Setting instructions

Drill hole

Knock in securing sleeve with mason's mallet until flush
