

# W-BAP 1 SINGLE ATTACHMENT POINT

AP 05.1

**Single attachment point for fastening in concrete and steel**

## Fastening with Würth W-VIZ Injection System

with WIT-VM 100 injection mortar and W-VIZ-A/A4 M16 anchor bar (h<sub>ef</sub> 125) or W-VIZ-IG/A4 M16 x 120 (internal thread)

### 1. Applications

- With general building permit Z-14.9-692
- Also tested in accordance with DIN EN 795:2012 Type A (tests relating to deformation, static and dynamic load-bearing capacity and integrity) and CEN/TS 16415
- Suitable for securing max. 3 persons
- The single attachment point can be used for repeating work in which there is a risk of falling, e.g. cleaning work, maintenance and assembly work, etc.
- The single attachment point may be used in reinforced or unreinforced standard concrete of a strength class of minimum C20/25 and maximum C50/60 in accordance with EN 206:2000-12

### 2. Advantages

- Saves space
- Very noticeable thanks to the yellow signal color
- Inexpensive alternative to other attachment systems
- Quick and simple installation and removal of the attachment point

### 3. Features

- Fastening of Würth W-BAP 1 with Würth W-VIZ/A4 or W-VIZ-IG/A4 injection system
- The load-bearing capacity of the surface must be ensured
- Pay attention to the installation instructions and to the approval of the individual attachment point and the means of attachment
- The single attachment point may only be fastened with the means of attachment listed in the table The general construction permit is void if these stipulations are not followed.

#### Good to know:

- **General construction permit Z-14.9-692 for concrete and steel**
- **Fastening in concrete With the proven W-VIZ/A4 M 16 (h<sub>ef</sub> 125) or W-VIZ-IG/A4 M16x120 (internal thread) injection system**
