W-KL Light Construction Anchor

(ABS plastic)

Setting tool
(steel, galv.)

Evidence of performance

1. Applications

- For secondary attachments in aerated concrete
- For the attachment of components in conjunction with a wood or particle board screw (no drill bit, counter thread, ring thread)
- Outside or in rooms subject to moisture in conjunction with a stainless-steel screw

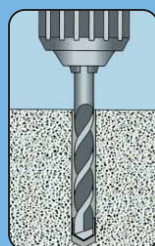

2. Advantages

- Expansion pressure-free anchoring
- Small edge and axial spacing possible
- The setting tool fits in bit holder 1/4"
- The PZ2 setting tool tip is suitable for screwing in the screw

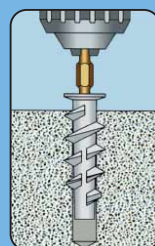

3. Properties

- High-quality ABS
- Fully resistant to rotting
- Temperature-neutral from -40°C to $+80^{\circ}\text{C}$
- Form-fitting attachment

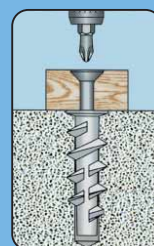

Setting instructions

Drill hole

Set dowel in place

Mount component
