12 & 24 volt

Independent

Optimal for all car and truck drivers who always have safety in mind when on the road.
In many European countries, the carrying of spare bulbs in the vehicle is recommended or legally required. Thanks to the compact spare bulb boxes, direct on-site replacement is no longer a problem. Your traffic safety remains in tact. To make bulb replacement as easy as possible, the bottom section of the box features a technical guide with application diagrams (each lighting point is assigned a suitable bulb). For improved presentation at the point of sale, the top of each spare bulb box features a hanging tab with a European hole.

Your advantages at a glance:

- Scratch and shock-resistant "emergency boxes"
- Customized outfitting, including the most common bladed fuses
- Independent replacement, directly on site
- Features hanging tab and European hole

Single Spare Automotive Bulb Box

For cars, motorcycles and vans
