

Technical data

- Max. 0 - 20 amps; max. 48 V DC.
- Batteries: two **Art. No. 0827 08 23** (A 23 / 12 V are included in the scope of supply).
- Cable length: approx. 75 cm.
- Size: 86 x 37 x 28.5 mm (L x W x H).
- Weight: approx. 70 g.

Automotive Current Tester

For standard fuses

Art. No. 0715 53 090

P. Qty. 1

For mini-fuses

Art. No. 0715 53 091

P. Qty. 1

Current measurement in automotive fuse boxes is often difficult with conventional multimeters because of the contacts. The flat fuse current testers from Würth were specially designed to solve this problem. They are simply inserted into the fuse slot and immediately indicate the current in the fuse circuit.

Since the fuse is inserted into the current tester while measurement is being carried out, the measurement circuit is also protected during measurement.
