

UV Leak Test Lamp

230 V / 100 W

Art. No. 0964 764 005

Pack Qty. 1

Supplied in a heavy duty steel case

- Prevents contamination or inadvertent damage of the lens.
- Safe storage.

With protective and effect-enhancing goggles

- Protective goggles must be worn when working with the UV leak test lamp.
- The goggles enhance the illuminating effect of the additive, enabling the technician to detect leaks more efficiently.

High efficiency 100 W bulb

- Due to the high output of the UV leak test lamp even the smallest leaks in the system can be detected, reducing the time required for leak detection.

Power supply cable approx. 8 m long

- Increased flexibility when working in and around the vehicle.
