# Pole Welding Clamp

- With malleable cast iron brackets.
- Connecting hole on the cast upper part.
- High tightening torque with wing screw, giving a good hold.

**Maximum current at 100% switch-on time 300 Amps.**

# Angled Magnet

**Magnetic angle fixer for fast holding and fixing during welding and soldering work and as a work aid.**

- Accurate joining of flat, curved and round metal components.
- Replaces the "second man" in assembly and thereby saves work time and costs.
- Simple removal by tilting to the side.
- The magnetic angle fixer offers the following angles: 30°, 45°, 75° and 90° (see figure). Other possibilities: 105°, 120° and 180°.
