

## DIESEL COMBUSTION CHAMBER CLEANER

### Application:

For all car and truck diesel engines. Contents of can are added to the fuel tank. The fuel quantity should correspond to the reserve volume here. We also recommend changing the fuel filter after cleaning. To be used in case of increased soot buildup.

Contents	Art. No.	P. Qty.
300 mL	<b>5861 012 300</b>	1/12

### Features:

Cleans the fuel system and combustion chamber and thus optimizes fuel consumption. The injection system is also cleaned if problems occur. Emission values are improved thanks to the cleaning effect.

**For the cleaning of the injection system and the combustion chamber for low-soot and particle-reducing combustion.**

### Loosens deposits, oil carbon and soot

- Reduces emission values
- To be used before emission testing (special exhaust gas test)

### Restoration of full engine performance

Optimizes fuel consumption
