

DIESEL SYSTEM CLEANER

For the removal of contaminants and deposits in the intake area without the need for dismantling work.

Cleaning effect

Cleaning of the intake area of diesel engines.

Improves engine performance

Remedies faults caused by deposits in the intake area.

Contents	Art. No.	P. Qty.
400 ml	5861 013 300	1/12

Application:

Clean only when the engine is at operating temperature!
Ideally, a test drive should be taken beforehand. Otherwise, allow engine to run for at least 20 minutes. During use, allow engine to run at different speeds up to max. 2,000 rpm. Use brief spray jets of max. 3 sec. After each spray jet, pause for 10 sec. Avoid fluid buildup!

Features:

Cleans the intake system of light to medium deposits. Disassembly work is not required here.
