

PETROL SYSTEM CLEANER

Special cleaner for all carburetor and gasoline fuel-injection engines

Cleans intake valves, combustion chamber and intake area

- Reduces increase fuel consumption
- Improves engine running and response

Protects against valve burn-through thanks to clean and tight-fitting valve seats

Contents	Art. No.	P. Qty.
300 mL	5861 112 300	1/12
Spray Hose	0891 564	1

Application:

At the appropriate location, disconnect the vacuum hose and insert the spray hose tube. With the engine warm and at approx. 2,000 rpm, spray half of the can's contents evenly in all intake ducts while at the same time moving the tube back and forth. Stop engine and allow product to soak in for approx. 30 min. Start engine and empty the rest of the can. Dosage: One can for 4-cylinder engines, two cans for engines with six cylinders or more.

Features:

Thanks to washing-active fuel-compatible active substances in a cleaning-active solution, a powerful cleaning effect is achieved with intake valves, in the combustion chamber and in the intake area.
