

# APPLICATION OVERVIEW OF PAINT FINISH / POLISHES

Product	P10	P20	P30	P55	PAINT SEALANT PINK
<b>Area of application</b>	Painters Detailers	Painters Detailers	Painters Detailers	Detailers	Detailers/End customers
<b>Area of use</b>	Very abrasive high-shine polish for the quick removal of imperfections in fresh repair and hardened finishing paints and for polishing out stubborn signs of use on used paints. Sanding marks from a grain of P1500 can be removed effortlessly.	Medium abrasive high-shine polish for efficient paint preparation, removal of signs of sanding and scratches from used paints and for the removal of imperfections on hardened repair finishing paints. Sanding marks from a grain of P2000 can be removed effortlessly.	Anti-hologram high-shine polish for lasting elimination of streaks and holograms on dark vehicle paints and for efficient removal of fine signs of sanding or slight paint irritations on used and new car paints. Sanding marks from a grain of P3000 can be removed effortlessly. Especially suitable as paint finishing paste if the paint was treated with coarser pastes beforehand.	P55 Combination Polish was developed especially for use on old and new paints. P55 enables preparation and sealing of the paint in a single step. The polish is characterized by its excellent removal rate and high shine when buffed.	Synthetic wax and durable polymers ensure lasting protection and a brilliant shine. Wax particles settle into the finest textures of the paint surface, leaving behind a mirror-smooth surface with brilliant color depth. Can also be polished off of hot surfaces without leaving residue. Free of volatile silicones.
<b>Application</b>	<b>Dust inclusions, sanding marks, orange peeling, paint irritations</b> Shake well before using. Moisten the surfaces of the selected polishing wheel evenly with the paste and apply a small quantity on the surface to be polished. Lay the polishing pad evenly on the area and start the machine. Using the appropriate amount of pressure and a speed of 1,500 - 2,000 rpm, process the surface until the paint irritations etc. have been removed. Proceed in sections!	<b>Signs of sanding and scratches, detailing used vehicles</b> Shake well before using.
