

# Cleaning – Restoration – Care of stainless steel and metal surfaces

## Application

Recreation

Automobiles

Food processing industry

Industry/workshops

Public facilities

Treatment of high-quality metal surfaces, such as chrome and stainless steel make the highest demands on cleaning and care products.

## Systematic application

### STAINLESS STEEL POWER CLEANER

For **preliminary cleaning** in case of coarse contamination, such as boring and cutting oil, greasy dust and processing residue.

### METAL RESTORER

For **restoration** and removal of stubborn dirt, such as metal oxidation, rust film, verdigris, lime and boiler scale. Also suitable for glass and glass ceramics.

### STAINLESS STEEL CARE SPRAY

**Cleaning emulsion** for thorough removal of dirt, polishing and wiping streaks. Creamy emulsion suitable for application on vertical surfaces.

### STAINLESS STEEL CARE OIL

Removes light contamination like dust, polishing streaks and greasy fingerprints. Suitable for daily care and for visual enhancement.

## Generally recognized as safe

Certified for use near foodstuffs, therefore **recognized as safe for use in food processing operations.**
