

# ALUMINUM POLISH

For cleaning and polishing.

Description/ Container	Cont. ml	Art. No.	Pack Qty.
Tin	500	0893 121 301	1/6

## Areas of application:

For old, weathered and new aluminum surfaces. For removing stubborn dirt such as metallic oxidations, initial easily removable rust, efflorescence and other deposits.

Setting up trade fairs, kitchens, vehicle and boat building, domestic installations, etc.

## Instructions for use:

Thinly apply aluminum polish and polish with a soft cloth in a circular motion until a black layer forms.

Finally, take a clean cloth and polish surface to a high gloss.

Remaining polish can be removed using the stainless steel power cleaner (Art. No. 0893 121 2).

Machine polishing is also possible.

▶ Paste-like polish.

### **The advantage for you:**

- Can be used anywhere.
- No running down vertical surfaces.

▶ Contains polishing additives with grease-restoring properties.

### **The advantage for you:**

- Leaves the surface smooth and water-repellent.
- Prevents subsequent adherence of dirt.

▶ Only a little polish required.

### **The advantage for you:**

- Goes a long way since only a minimal amount of polish is required.

## Technical data

Basic ingredients	Carbon dioxide/water emulsion
Colour	dark grey
Density g/ml	1.0
Viscosity	1500 mPas
pH value	8.5
