

DIESEL STABILISER

Protects against and destroys bacteria, yeasts and mildews in the fuel system.

Prevents the growth of bacteria
Ensures functionality

Fights against acute bacteria proliferation
Restores functional reliability

Contents	Art. No.	P. Qty.
1 L	5861 004 001	1
5 L	5861 004 005	1
20 L	5861 004 020	1

Application:

For Diesel fuel systems in construction vehicles, utility vehicles, motorhomes, cars and storage tanks.

Add to the fuel tank at a ratio of 1:1,000 (preventive) or 1:200 (problem cases); 50 mL to 50 L of fuel is sufficient.

Features:

The highly effective biocide increases the operating reliability of all diesel fuel systems. Prevents the growth of bacteria in diesel fuel. Neutralizes acids arising from microbial growth and decontaminates fuel systems in which microbe proliferation has already occurred.
