

SANITATION CLEANER

Thanks to its natural citric acid basis, the environmentally-friendly ECO LINE sanitation cleaner cleans sanitation fittings without damaging the material. Guaranteed to be a high-quality, eco-friendly product, as indicated by its European Ecolabel.

Environmentally friendly
Increased biodegradability.

Efficient

The citric acid removes limescale, water spots, soap residue and stubborn urine scale without damaging the material.

Innovative

Can also be used as a WC cleaner thanks to a slanted spray cap.

Freshness effect

Leaves behind a fresh, lemony aroma.

Content in ml	Art. No.	P. Qty.
1.000	0893 117 117	1/12

Use:

Mix approx. 20 ml of cleaning concentrate in 8 litres of cold water and wipe in the usual manner. Increase the dosage if the dirt is too thick. Where dirt is particularly stubborn, the cleaner can also be used undiluted. Next, rinse thoroughly with water.

Applications:

Suitable for manual cleaning on acid-resistant surfaces such as washbasins, taps, showers and bathtubs and also on wall and floor tiles.

Note:

Before using on non acid-resistant materials, check that the cleaner does not damage the material.

Technical Data:

pH value in concentrate	2
pH value in application concentration	approx. 3
color	Red
Scent	lemony
