

FAÇADE ADHESIVE

Contents in ml	Art. No.	P. Qty.
800	0892 400 10	1/12

Areas of application:

Suitable for the adhesion of insulation plates in outside façades, interior walls and insulation and drainage elements. Thanks to its outstanding adhesive properties, reduced foaming and quick final strength, this façade adhesive is suitable for a large number of other adhesive applications involving insulation panels. Examples include the

attachment of attic insulation, the mounting of soffits and casings, the adhesion of masonry edging strips etc.

Remarks:

Sticks to Styrofoam, Styrodur, mineral wool, hard polystyrene and polyurethane foam, corrosion-protected steel plates, fiber cement, aerated concrete, chipboard, hard PVC, brick, plaster, wood and dispersion paints, but not to polyethylene, silicone or PTFE.

1-component polyurethane foam for the attachment of insulation panels to façades as per DIN EN 13163

Tried-and-tested product features

- General construction approval from the German Institute for Construction Technology
- Test certificate for construction class B1 as per DIN 4102-1:1998-05 of the Material Testing Institute in Hanover

Cost and work reduction

- Minimal material consumption
- Transport and storage savings
- No need for time-intensive mortar application
- Enables additional heating insulation

High initial adhesion, even at low temperatures

- Does not flow, but rather forms a stable and high-adhesion bead of adhesive immediately
- Not sensitive to low temperatures

Technical data:	
Basis	Self-adhesive polyurethane adhesive
Substrate and environment temperature	+5 °C to +30 °C
Temperature resistance	-40 °C to +90 °C
Non-sticky surface*	5 - 10 min
Hardening time*	1.5 - 5 h, depending on the temperature and humidity
Released-foam yield	43 - 47 liters
Thermal conductivity* (DIN 52612)	0.029 W/m K
Tensile strength (DIN 53455)	0.15 - 0.18 MPa
Compressive strength (DIN 53421)	0.04 - 0.05 MPa

*Measured at 20 °C and 65 % humidity.
