

PURLOGIC® XPRESS

For professional processing of 1-component gun foam.

Low intrinsic weight

Easy, effortless handling

Ergonomic handle shape

Fits securely in your hand

Optimized sealing system

A seal combination eliminates the need for readjustment of the needle seal

Dosable outflow of foam

Exiting foam quantity can be variably adjusted for clean spraying pattern

Easy cleaning

Collections of foam are reduced by the nano-coating of the needle and the cone

| Designation | Content | Art. No. | P. Qty. |
|----------------|------------------------------------|---------------------|---------|
| Nozzle Set | Brass nozzles for PURLOGIC® Xpress | 0891 152 210 | 10 |
| Extension tube | - | 0891 152 211 | 10 |
| Flat Nozzle | - | 0891 152 212 | 20 |

Notes on application:

A polyurethane foam can should always be screwed onto the PURLOGIC® guns. The gun should be cleaned with PURLOGIC® Clean at regular intervals. Please observe instructions for use.

Note:

Compatible with all Würth 1-component gun foams. When used with other polyurethane foam cans, the function should be tested beforehand.
