Mixing Table		
Soiling	Manual	High-pressure unit
Normal	<b>1:20</b>	2 - 3%
Heavy	<b>1:5</b>	3 - 5%

### Use:

Dilute with water based on the degree of soiling and spray onto the soiled surfaces of the vehicle. Allow it to work in briefly and then rinse thoroughly with water. Repeat procedure in case of heavy soiling if necessary.

Mixture ratio: 1:1 to 1:20.

### Note:

Do not spray on hot surfaces or use in direct sunlight. Do not let it dry without finishing the cleaning procedure. Protect from frost.

**Cleaner concentrate for basic cleaning by professional vehicle detailers.**

### High cleaning performance

- Street dirt, oil, grease and other soiling is removed quickly and thoroughly.
- Can be applied by hand or with a high-pressure unit.
- No foam buildup.

### Concentrate

- Individually adaptable to the soiling at hand.
- Efficient in consumption.
- High yield.
- Saves money.

**Oil and grease are penetrated and removed without emulsification, i.e. quick separating as per eco-standard test B 5105.**

- The waste water which results can easily be separated with the light-oil separator.

### Gentle on materials

- Can be used without hesitation on all surfaces.

**Does not contain phosphate or organic solvents. AOX-free**

- Potential dangers are reduced with daily use.
- Reduced burden on the environment.
- Corresponds to local wastewater statutes.
- Not labelled in accordance with the Gefahrenstoffverordnung (Hazardous Material Ordinance).

**Biodegradability of over 95%.**

**PH value (full strength): 8.3**

**Silicone-free**
