

CUT+ COOL CUTTING AND DRILLING OIL/PASTE PERFECT

Designation/Container	Contents	Art. No.	P. Qty.
Aerosol	400 ml	0893 050 008	6
Canister	5 l	0893 050 009	1
Can	500 ml	0893 050 010	1/6

Perfect Drilling and Cutting Oil

Applications:

Optimum use with all chip-producing machining work of all materials like steel, high-alloyed steel, aluminum, non-ferrous metals, titanium, carbide, cast metal, etc.

Please note:

Chlorine, silicone, heavy-metal and resin-free.

Free of substances which interfere with wetting of paint

Perfect Drilling and Cutting Paste

Applications:

The drilling and cutting paste is especially suitable for heaviest machining processes, such as for maximum-strength hard steels, tool steel, ball-bearing steel, CrNi alloys and Hastelloy.

Please note:

Chlorine, silicone, phosphorous, heavy-metal and resin-free.

Free of substances which interfere with wetting of paint

High-performance cutting oil for the heaviest machining work and higher cutting speeds.

Reliable and efficient use

- Excellent results and safety for all materials and applications
- Longer tool life
- High level of corrosion protection
- Can be welded without prior cleaning when small amounts are used in micro-spraying systems

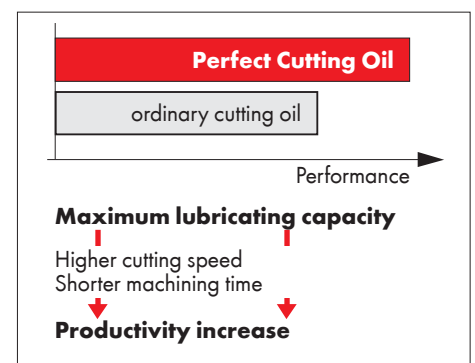

Can be used as minimum-quantity lubricant in micro-spraying systems

Top performance, excellent results due to specially matched components

Paste for heaviest machining

- Problem-free machining of highest strength hard steels
- Horizontal and overhead applications can easily be carried out

Products that reduce the potential hazards at the workplace, when handling and during storage.
