

FILL LEVEL INDICATOR

Ideal for greater transparency when handling drums

Art. No. 0891 620,001

P. Qty. 1

- The float lies on the liquid in the drum and permanently indicates the drum content on the volume scale.
- Includes a separate scale for both 60 liter and 210 liter drums.

Technical Data:	
Float diameter	2.5 cm dia.
Float length	10 cm
Bearing and spool material	POM
Thread material	Polyester
Float material	PE with fuel
Transparent cover material	Grilamid L20g

Instructions:

Can be used for the standard 60 liter and 210 liter drums. The filling level indicator is fitted on the $\frac{3}{4}$ " ventilation opening. This allows a barrel pump to be used at the same time on the drum's 2" bung opening.

Applications:

Suitable for all standard barrels with a $\frac{3}{4}$ " ventilation opening. Can be used for all non-corrosive liquids such as oils, window anti-freeze, radiator anti-freeze, cooling lubricant, concentrates, emulsions, heating oil etc. and liquid media.
