

PAIN T AND WHEEL SEAL

| Container | Content | Art. No. | P. Qty. |
|-------------|---------|---------------------|---------|
| Aerosol can | 400 mL | 0893 012 301 | 1/12 |

Applications:

For long-lasting sealing of all paint surfaces, as well as aluminum, chrome and alloy wheel rims.

Use:

Before using, shake can well and spray sparingly onto the clean surface from a distance of 20 - 30 cm. After 2 to 3 minutes of working in, polish out with a clean cloth (not a microfiber cloth) (go section-by-section).

Notes:

- We recommend wearing gloves during use.
- The best results are achieved when the surface is free of silicone, wax and polish residue.

Notes for use on wheel rims:

- When applying the material to the wheel rims, it can end up on the brake disks. In this case, carefully release the brakes again until full braking power is achieved.

Long-lasting protection of paint and wheel rims from the effects of weather.

Water beads up well thanks to the easy-to-clean effect

Extremely long-lasting and car wash-proof

Quick-acting

Protects paint and wheel rims from the effects of weather

Increases color brilliance

Insect soiling and other soiling are verifiably easier to remove
