

TIRE FOAM

Application:

Spray the foam evenly onto the tire side walls and allow it to dry. It does not have to be wiped off afterwards. Can also be used on wet tires. Pre-clean briefly if tires are very dirty.

Note:

Do not spray onto tire running surfaces, brake disks and brake drums. Contains silicone.

High-quality care product for tire side walls.

Cleans, preserves, protects

- Simple application in one step, thereby saving time
- Does not have to be wiped off afterwards
- Ideal before putting tires into storage (summer / winter)

Silk matt sheen

- New tire effect
- Improves the vehicle's appearance, making it particularly suitable for display vehicles

Optimum UV and ozone protection

- Tires do not fade
- Prevents brittling and cracking caused by age

Foam

- Economical application
- Medium does not run off

Protects against dust and splash water

Solvent-free

Does not attack paint, plastic, rubber and metals.

AOX-free

INTENSIVE RIM CLEANER

Application:

Spray liberally onto the wheel rims. Allow it to take effect for about 5 minutes and then clean by hand or in the car wash. The cleaning effect can be increased by allowing it to take effect for longer (up to max. 30 minutes) and by using a cleaning brush.

On bolted and polished rims, above all rinse off the bolt connections thoroughly with clear water.

Note:

Do not use on hot rims or in direct sunlight.

For all painted and unpainted light metal rims and steel rims

Excellent cleaning performance thanks to a new gel formula

- Does not run off, allowing the product to take optimum effect
- Even the most stubborn dirt such as brake lining abrasion, gray veil, tar, oil and road dirt are removed very effectively

Acid-free

- Does not damage materials and surfaces
- Especially suitable for polished and very high-quality light metal rims
- Not a hazardous material, so safe to use

User-friendly

- Does not run, so economical to use
- Pleasant non-pungent aroma.
- Can be left to take effect for longer periods (up to 30 minutes)
- Easily separable, i.e. fast-separating in waste water in accordance with German Ecological Standard Test B 510

pH value: 10.0

AOX-free and silicone-free
