

REVOLUTION WINDOW ADHESIVE

Isocyanate-free, primerless one-component PU-hybrid window adhesive.

Multi-purpose modular unit

Can be used for all common car and van types.

Suitable for antennas, non-conductive

Prevents contact corrosion.

Ideal for use on aluminum, magnesium and hybrid chassis.

Tested safety

Drive-away time crash tested as per FMVSS208/212. Meets requirements of original equipment manufacturers (motor-vehicle manufacturers). Manufactured in accordance with OEM standard ISO 9001.

| Contents | Art. No. | P. Qty. |
|----------|---------------------|---------|
| 300 mL | 0890 023 501 | 1/12 |

Notes:

When preparing subsurfaces, we recommend cleaning the window with Basic Cleaner S. The use of the product in conjunction with the Würth Active Cleaner and Würth Contact Clean is required. The products are to be checked to ensure that they have not expired before they are used. Observe the information provided by the vehicle manufacturer in regard to bead geometry. The application and drive-away times must be observed.

Instructions:

A clean environment is to be selected for application. Apply adhesive while guiding the gun vertically, starting from the center at the bottom of the window. The work instructions accompanying the product are to be followed during application.

Areas of application:

Replacement glazing of cars and small vans.

| Technical data: | |
|--------------------------------------|---|
| Chemical basis | One-component polyurethane hybrid adhesive (moisture-hardening) |
| Color | Black |
| Application temperature | +5 °C to +35 °C |
| Skin-formation time | 15 min. |
| Shelf life (when stored under 25 °C) | 12 months |
| Drive-away time without airbag | 1 hr.* |
| Drive-away time with airbag | 2 hrs.* |

*Measured at 23 °C/50% relative humidity

This information is only a recommendation based on our experience. Preliminary testing required! While using the product, both the technical data sheet and the specifications of the applicable regulations are to be complied with.
