

OIL BINDER

Oil binding agent in granular form for removing oil stains and other chemicals from workshop floors, workbenches etc.

Extremely high absorbency

- 1 liter of oil binder absorbs 0.6 liters of oil without pressure.
- All substances containing oil are picked up.
- Substances picked up remain 100% bound and are not released again.

Buoyant

Does not absorb water. Therefore also suitable for use in water.

The oil binder is completely nonpoisonous and shows no toxic effects.

Flash point: 300 °C

Can be stored indefinitely

Note:

After use, the oil binder is toxic waste and must be properly disposed of at a facility intended for this purpose.
Not suitable for hydrofluoric acids.

OIL BINDING CLOTH

For absorbing oil and chemicals

Absorption capacity is 25 times its own weight.

Oil binding cloth is oil-attracting and water-repellent.

Area of use:

The oil binding cloth is used to absorb oils, chemicals and other spilled liquids.
Can also be used to catch dripping oil.

Application:

Lay oil binding cloth directly on the area to be protected against dripping oil. In addition, it is also possible to absorb an oil stain that already exists using the oil binding cloth. In this case, simply lay the cloth over the oil stain.
