

COMPRESSED AIR HOSES

The highly flexible, fabric-reinforced PVC hose for the most demanding requirements of compressed-air applications.

- Low in weight and extremely flexible.
- High mechanical strength, resulting in a long service life.
- Very high UV resistance, making it also ideal for use outdoors.
- Resistant to shocks and being stepped on.
- Resistant to oil and gasoline.
- Max. operating pressure 16 bar
- Operating temperature -15 ° to +60 °C.

Areas of application:

- Compressed-air supply for tools.
- Pneumatic control of machines.
- Ideal for the workshop and construction site.

Compressed air hose, completely assembled

(incl. push-in tip and quick-action coupling)
