

WINDSHIELD CUT-OUT SET

Delivery Scope		
Pos.	Designation	Art. No.
1	Windshield cut-out device	0714 58 212
2	Square cutting wire, 50 m, 0.6 mm	0714 58 282
3	Wire probe for pulling in cutting wire	0714 58 213
4	Fastening hook for securing wire	0714 58 214
5	2 small protectors, straight and curved edge	0714 58 218
6	Safety goggles with side protection	0899 102 250
7	Gloves, Size 9	0899 400 530
8	Mounting wedge set, with 4 different shapes	0714 58 216
9	Plastic case	0962 219 002

Pos.	Spare Parts	Art. No.
10	Ratchet unit	0714 58 221
11	Spool with mounting sleeve	0714 58 222
12	Suction cup plate with pump (large)	0714 58 223
13	Telescopic arm	0714 58 224
14	Clamping screw with clamping block	0714 58 225
15	Deflection head with rollers (without suction cup plate and pump)	0714 58 226
16	Suction cup plate with pump (small)	0714 58 227
17	Clamping screw (individual)	0714 58 228

Fast, simple cutting out of glued motor vehicle windshields and rear windows, especially with small gap dimensions at edge of window

Art. No. 0714 58 211

Convenient handling with just one person

- Thanks to ratchet spool positioned once, entire system remains positioned centrally on window. Only the deflection unit must be repositioned 4 times.

Interior linings need not be removed

- With use of protector and extremely flat wire deflection unit. Damage to clips, cables, airbags and sensors is prevented.

No damage to windows and sealing lips

- Thanks to circumferential wire guidance directly on adhesive bead. This enables undamaged windows to be remounted.

Simple cutting in corner areas

- Perfect, flat wire guidance with two deflection rollers

No slipping away of suction cups with high tensile forces

- With lockable telescopic arm and extremely large suction cup plate

Optimal combination of product range

- Set contains all necessary tools, aids and occupational safety products for cutting out windows

Windshields with very close gap dimensions

Cutting out a rear window

Using on a glued van side window
