

Fabric Sanding Rolls

Features:

- Base material: J cotton fabric/super flexible.
- Bonding: synthetic resin bond.
- Grain: Aluminium oxide.
- Suitable for ORSY 10 unrolling dispenser.

Technical features

- Close and even scattering for even sanding pattern.
- Super flexible design.
- No grain breakout, even with tight radii and curvatures.

Unrolling dispenser, large with 6 reels, not loaded

Art. No. 0956 109 0

P. Qty.: 1

Applications

For machining solid wood and veneers, especially for hand sanding. The fabric-based sanding material can be used where highly profiled parts/curvatures have to be sanded. The super flexible design is a must for this kind of work. Our fabric grinding rolls meet this key requirement.

Grain	Roll width in mm	Roll length in m	Art. No.	P. Qty.
60	115	25	0675 115 60	1
80			0675 115 80
