

## SANDING BELTS FOR TUBE BELT SANDER

Abrasives: Aluminum oxide  
 Color: Gray  
 Bonding: All-synthetic resin  
 Backing: Semi-flexible X-base  
 Scattering: Micro-replication  
 Connection: Red film  
 Granularity: P120 - P600

Illustration of three-dimensional pyramid structure

### Trizact Fabric Sanding Belts® \*

#### Application:

Sanding and polishing (finish sanding) and removing rolling skin.

#### Design: Aluminum oxide

#### Semi-flexible X-backing

**Your advantage:** High adaptability

→ Uniform surface quality on profiled surfaces

#### Uniform grain structure in three-dimensional pyramid structure

**Your advantages:** Aggressive grinding, low roughness, considerably longer life, extremely fine sanding pattern.

#### Sanding-active additives

**Your advantage:** Low sanding temperature

→ Very cool grinding, no material discoloration.

#### Materials to be machined:

Stainless steel, rust, acid and heat-resistant steel (high-alloyed), steel and non-ferrous metals.

### Reclosable fleece belts with velour backing and Velcro closure

#### Applications:

Matting, burnishing, polishing and for matching transitions. Cleaning oxide coatings and removing tempering color.

#### Materials to be machined:

Forged steel, malleable cast iron, gray cast iron, carbon steel, deep-drawn steel, steel band, injection-molded zinc, non-ferrous metals, Cr-Ni and other stainless steels, as well as wood.
