

SANDING BELTS FOR TUBE BELT SANDER

Abrasives: Zirconium-corundum
 Color: Blue
 Bond: All-synthetic resin with grinding-active additives
 Base: X-cotton fabric
 Connection: green film (P40), blue film (P60 - P120)
 Granularity: P40 - P120

For preparing, repolishing and smoothing welding seams, and for polishing, initial sanding, rust and paint removal from round rods, railings, pipe elbows and pipes in visible area.

Zirconium-corundum fabric sanding belts

Applications:

Sanding pipes, pipe elbows and closed pipe structures, sanding welding seams, removing tempering color, rust and scale removal.

Design: Zirconium-corundum

Rugged cotton fabric

Your advantage: Sturdy base, high tear resistance.

All-synthetic resin bonding with grinding-active additives

Your advantage: Long service life and cool sanding.

Materials to be processed:

Stainless steel, rust, acid and heat-resistant steel (high-alloyed), steel and non-ferrous metals.
