

BURNISHING MACHINE

For burnishing, polishing, smoothing, matting, texturing, deburring and roughing surfaces.

SM 100
Art. No. 0702 460

- Produces shadow-free, smooth surfaces on wood, metal, stainless steel and plastic.
- Features electronic adjustment for material-appropriate speed setting.
- Features soft start and overload protection.
- Features suction device for connecting to industrial vacuum cleaners (hose dia. 27 mm).
- Height-adjustable guide rollers allow flat working of the surface thanks to a constant contact pressure.
- Max. sanding block diameter of 100 mm for fast work across the entire surface.
- Quality made in Germany.
- 3-year warranty.

Delivery scope		
Designation	Art. No.	P. Qty.
SM 100 Burnishing Machine	-	1
Burnishing Roller 100 mm x 100 mm Combination abrasive fleece-cloth	0672 918 150	1
Suction device (detachable)	-	1

Technical data	
Power consumption	1,200 W
Output	700 W
Voltage	230 V
Tool mount	Wedge taper 6 mm; dia. 19 mm
Abrasive block dia. max./width max.	100 mm/100 mm
Speed range	1,200 - 3,700 rpm
Weight	3.6 kg

Accessories

Spacing Disks

- Required when using sanding blocks of a width less than 100 mm.

Art. No. 0702 460 001 P. Qty. 1

Drive Roller

- For machining pipes, pipe connectors and valve seats in conjunction with sanding belts.
- Features bulb.

Art. No. 0702 460 003 P. Qty. 1

Metal Carrying Case

Art. No. 0955 702 460 P. Qty. 1

Examples of use

- Cleaning and smoothing handrails.
- Derusting, de-scaling, smoothing and polishing railings.
- Textured finish on pipe outlets.
