

DIAMOND CUTTING DISKS

Wall Slit Cutter

Yellow, Universal

Very good standard disk for construction site use with changing materials

- For dry and wet cutting  
- Fan segments for better dissipation of heat and removal of dust in comparison with conventional segments
- Higher cutting performance

Frequent applications

(See table for additional applications)

Old concrete, concrete

Concrete, abrasive

Sand-lime brick

Clinker bricks

Poroton bricks

Dia. in mm	Hole in mm	Segment height in mm	Segment thickness in mm	Number of segments	Segment connection	Max. rpm	Art. No.	P. Qty.
115*	22,23	7	2,2	9	Laser	13.300	0668 775 115	2
125*	22,23	7	2,2	10	Laser	12.200	0668 775 125	2
130*	22,23	7	2,2	10	Laser	11.800	0668 775 130	2
150*	22,23	7	2,4	12	Laser	10.200	0668 775 150	2

* Max. circumferential speed 80 m/s.

SPECIAL DIAMOND CUTTING DISK

Joint Cutter

0666 100 150

For use on joint cutters

For detaching/cutting out built-in building elements such as windows or doors

Dia. in mm	Hole in mm	Segment height in mm	Segment thickness in mm	Number of segments	Segment connection	Max. rpm	Art. No.	P. Qty.
150*	25,4** for MM ¹	8	1,9	12	Laser	10.200	0666 100 150	1
180*	22,23** for MM ²	9	1,9	10	HDS (High-pressure sinter process)	8.500	0666 100 180	1

* Max. circumferential speed 80 m/s.

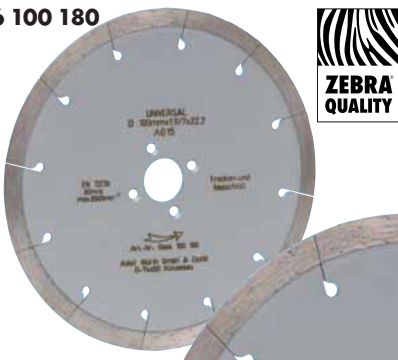

** Machine-specific holder

MT= Machine type:

1 BEPo FFS 150

2 Würth FF 180 (Art. No. 0702 910 1) and fine MF12-180

0666 100 180

Frequent applications

(See table for additional applications)

Plaster, masonry, cement, concrete, tiles, fastening straps/brackets made of metal.
