

# Pulling Adapters

for dent removal adhesion technology

**Pulling adapters for paintless dent removal.**

- Large selection of adapters for professional and effective dent removal with adhesive technology.

Use with PinPuller®

Use with Dent Lifter

Use with Maxilifter

**PinPuller® adapter** for PinPuller®, Minilifter, Dent Lifter, Maxilifter

Designation	Art. No.	
Adapter: round, convex (red), dia. of 16 mm, for very small dents, e.g. dent remnants	0691 500 160	10
Adapter: round, convex (red), dia. of 21 mm, small dents, e.g. typical hail-impact dents	0691 500 161	
Adapter: round, convex (red), dia. of 27 mm, for larger hail-impact dents	0691 500 162	
Adapter: round, convex (red), dia. of 32 mm, for pre-pulling dents for the pusher lever	0691 500 163	
Adapter: right-angled (red), 16 x 32 mm, esp. suitable for angled dents, e.g. from a door-impact	0691 500 164	
Adapter: round, convex (red), 5 x 16 mm diameter and 5 x 27 mm diameter (comb. assortment)	0691 500 154	
Adapter: round, convex (red), 5 x 21 mm diameter and 5 x 32 mm diameter (comb. assortment)	0691 500 155	

The marking cross on the back of the adhesive enables precise, trouble-free adhesion of the adapter to the deepest part of the dent.

The adapters have a convex adhesive surface. This ensures direct contact up to the base of the dent.

The fluted adhesive surface improves the adhesion properties and increases the tensile strength on the dent.

**Dent lifter adapter** for PinPuller®, Dent Lifter, Maxilifter

Designation	Art. No.	
Adapter: round, stiff (yellow), dia. of 40 mm, for round, large-area deformations and high tensile strength	0691 500 115	10
Adapter: round, flexible (violet), dia. of 40 mm, for round and misshapen deformations	0691 500 116	
Adapter: oval, stiff (yellow), 47 x 33 mm, for large elongated damage and high tensile strength	0691 500 117	
Adapter: oval, flexible (violet), 47 x 33 mm, for scratches, can be adapted to contours	0691 500 118	
Adapter: round, small (blue), dia. of 35 mm, for small, round deformations	0691 500 121	
Adapter: barrel-shaped (violet) 37 x 33 mm, adhered next to one another in scratches	0691 500 122	

The yellow adapters are made of firm, stiff material. This enables the adapter to handle the greatest impact and tensile loads.

The violet adapters are made of flexible, shapable plastic. They can be adapted to specific body contours by warming them with a hot-air blower.

The barrel-shaped adapters were designed for elongated damage. After being adhered to the deformation, they are pulled in an alternating fashion.
