

PinPuller

Art. No. 0691 500 170

Universal dent puller for welding and adhesive machining on bright steel and painted surfaces.

Versatile

- Suitable for removing small to medium dents and gashes with and without refinishing.
 - Due to the excellent versatility, it is extremely efficient and profitable.

Exact and efficient

- The independently adjustable legs and support feet can be adapted precisely to the deformation.
 - By accurately resting the device on the edge of the dent, this is not pulled upwards.

Quick and simple

- The legs can be adjusted to any contour in a matter of seconds and without tools.
 - No time wasted by tiresome conversions and searching for tools.

Flexible down to the last detail

- Rotatable pulling axis can be rotated precisely to the edge of the dent if the contour is not the same as the edge of the dent.
 - Adapts to every situation.

With different accessories for the following applications:

Bright sheet steel with PinPuller electrodes.

Painted surfaces with Minilifter puller.

Adjustable legs for different situations:

Includes:

PinPuller with puller for PinPuller electrodes in high-quality plastic case.

Accessories:

Minilifter puller
Art. No. 0691 500 183

For all minilifter and dent puller adapters

Replacement support feet

Art. No. 0691 500 156

Support feet (1 pair) with rubber coating

Narrow support for small dents and gashes.

Wide support for large deformations.

Different leg positions permit adaptation of angle and height.

Extremely easy adjustment of the legs:

Pull the legs apart slightly.

Pivot into desired position and release.

Rotatable pulling axis:

The pulling axis is freely rotatable around 360°.
