

PinPuller® - Replacement Electrodes

- Worn or damaged electrodes can easily be replaced with the help of a scriber.
- The special steel alloy makes a particularly strong connection with the vehicle body with the minimum of welding energy.
- Total length: 40 mm, brass-coated steel.

Designation	Art. No.	
Replacement weld-on electrodes with springs	0691 500 174	20
Scriber	0714 70 09	1

Work instructions

Eroded electrodes due to excessively long welding time.

Ideal electrodes with projection that can easily be filed down again.

Optimum work results thanks to PinPuller®-Spot Art. No. 0691 500 290.
