Levering and Flattening Tool

- The break proof, impact resistant special plastic prevents any paintwork damage.
- The long form and low weight makes this an ideal lever tool.
- The differently shaped ends (spoon and ball shapes) make this tool ideal for flattening inaccessible car body damage, e.g.:
 - doors
 - wings
 - boot lid.
- For aluminium and zinc-plated bodywork, as there is no damage of the bodywork protection.

Plastic Trim Wedge

- For all work on decorative strips and rubber seals.
- The wedge shape makes this tool ideal for aligning car doors.
- The special plastic avoids any paintwork damage.
