

THE NEW GENERATION OF BRUSHES

Your advantages: Improved painting results and time savings thanks to the innovative, top quality bristle mixture which is matched to the respective material being applied!

- Good drawing in and application of paint
- Minimal swelling in water/water-based materials
- Supple and dimensionally stable
- Smooth brush action
- Full and clean coverage
- Optimum brushing of the surface
- Precise trimming
- Easy to clean

For lacquer & paint systems containing solvents: For water-based lacquer & paint systems:

1 Unpainted wood handle
Optimum grip

2 Stainless steel/aluminum ferrules
Fully corrosion resistant

Fully bonded ferrules
(On flat brush and facade brush)
Greater stability of the brush

3 Bristle mixture
Mixture of high quality, black China and polyester bristles (tops: 90%*)

1 Unpainted wood handle
Optimum grip

2 Ferrules made of high quality polyamide:
Fully corrosion resistant, resistant to solvents and heat

Fully bonded plastic ferrules
Absolutely liquid-tight

3 Bristle mixture
Mixture of high quality black and white polyester and polyamide bristles (tops: 90%*)
