

## COMPRESSED-AIR BRUSH SANDER

### Application examples for Compressed-Air Brush Sander 3500

- The 23 mm brush belts are especially well-suited for use on larger surfaces.
- The 11 mm brush belts are characterized by especially good performance and ease of handling in hard-to-reach areas.

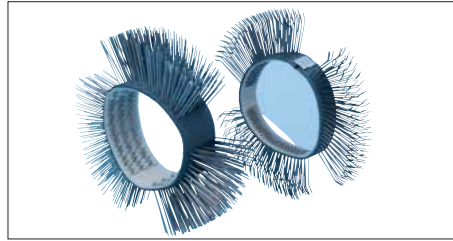

23 mm wide

**Art. No. 0703 350 4** P. Qty. 5

Application: For removing paint and corrosion on aluminum bodies and superstructures, especially in the area of rivets on truck bodies. No sandblasting effect!

### The stainless-steel brush belts

11 mm wide

**Art. No. 0703 350 41** P. Qty. 5

### Film Rubber

23 mm wide

**Art. No. 0585 91** P. Qty. 1

Application: For the removal of films, stickers and adhesive residues on metallic and paint surfaces. Contact surface twice as large (b=30 mm) as that of an ordinary film eraser. This together with the higher speed results in considerably faster material removal.

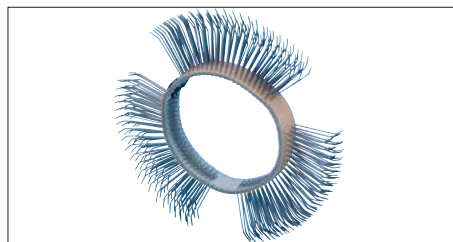

### The medium brush belts

11 mm wide

**Art. No. 0703 350 81** P. Qty. 10

Application: High-performance rust removal brush with deep-pore cleaning effect especially on edges and in hard-to-reach areas. With sandblasting effect!

Adapter **Art. No. 0703 350 2** P. Qty. 1  
(23 mm)

Adapter **Art. No. 0703 350 21** P. Qty. 1  
(11 mm)

For mounting the brush belts.

Exhaust air to the rear with connection for exhaust-air system **Art. No. 0709 838 053** P. Qty. 1
