

INDUSTRIAL VACUUM CLEANER FOR WET AND DRY MATERIALS

The right vacuum cleaner for any application. The devices feature an automatic filter cleaning system (except ISS 35).

ISS 35
Art. No. 0701 137 0

ISS 35-S automatic
Art. No. 0701 138 0

ISS 45-M automatic
Art. No. 0701 146 0

ISS 55-S automatic
Art. No. 0701 156 0

Dust class M (ISS 45-M automatic only)

The unit is ideal for the vacuuming of dry, non-flammable, harmful dusts at machines and devices, dust class M pursuant to EN 60335-2-69.

Restriction: None of the vacuum cleaners listed here may be used to vacuum up asbestos or other carcinogenic substances, except for wood dust.

Automatic filter cleaning system (all automatic versions).

Constantly high suction power, no manual starting via a trigger is necessary.

Continuous speed regulation (except for SS 35).

Individual adaptation of the suction power to the respective use.

Flat folding filter does not extend into the canister.

Optimum utilization of the canister volume.

Accessories feature practical clip.

Quick and secure connection without inconvenient screwing in.

3-year warranty.

On manufacturing and material defects.

Automatic filter cleaning system (except for ISS35)

The flat folding filter is cleaned automatically via an air blast approx. every 15 sec. (pulsing noise). This guarantees:

- Effective filter cleaning for constant high vacuum power.
- Long operating time without filter change.
- Low maintenance costs.

Connection system

Clip system for quick and easy changing of accessory parts and secure retention of the components.

Connection of insertable accessory (compatible with previous models).

Connection of clipable accessory.

Accessories

Anti-static apparatus – leads static electricity discharges, e.g. that arise when grinding plastics, away from the user.

Vacuum cleaner with anti-static preparation ISS 45-M automatic.

Anti-static hose Art. No. 0702 400 275.

Connection piece on grinder, electrically conductive Art. No. 0702 400

042. Grinder
