

HKS 55 COMBINATION HAND-HELD CIRCULAR SAW

Very handy hand-held circular saw with plunge function for universal use.

Some illustrated accessories not included.

Art. No. 0702 157 0

P. Qty. 1

Can be used as plunge-cut saw.

Applications which were previously only possible with special plunge-cut saws can also be carried out.

Very handy and lightweight (3,700 g) thanks to die-cast magnesium.

Its low weight increases working comfort and reduces the amount of force expended while working.

Speed adjustment wheel with electronic feedback.

Adjusting the idling speed allows different materials to be sawed.

Spindle lock with locking function

Saw blades can be changed quickly, as the pendulum hood and saw blade remain locked automatically.

3-year guarantee

On manufacturing and material defects.
