

BIT IMPACT FLEX

Bit Impact Flex TX

Bit Impact Flex PZ

Bit Impact Flex PH

High-performance bit for difficult screw applications, particularly for use with tangential impact screwdrivers.

Longer service life

The enlarged torsion zone enables a twisting angle of the bit of over 40° and thus absorbs the peak loads (of impact energy of difficult screw applications) which arrive.

Greatly reduces time and money expended

- Up to twice the service life in comparison to other high-performance impact bits found on the market.
- Up to three times the service life in comparison to regular standard bits.

Designation	Tip	Mount	Length in mm	Art. No.	P. Qty.
PH1		1/4" hexagon	29	0614 176 275	5
PH2				0614 176 462	
PH3				0614 176 647	
PZ1				0614 176 641	
PZ2				0614 176 642	
PZ3				0614 176 643	
TX10				0614 311 03	
TX15				0614 311 53	
TX20				0614 312 03	
TX25				0614 312 51	
TX30				0614 313 03	
TX40				0614 314 03	

Especially suitable

- For use with high-performance tangential impact screwdrivers
- For extremely high loads in difficult screw applications (e.g. in hard wood, metal, sheet metal etc.)

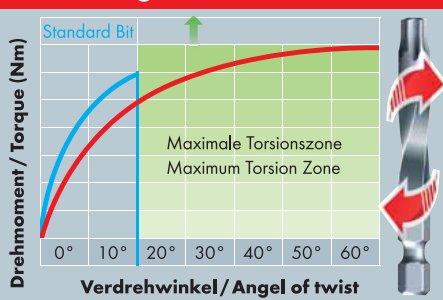

Broad range of uses

Fits into every standard bit holder and in direct mounts of impact screwdrivers

Safety

The overmold prevents slivers from flying around should the torsion zone break

Extra long lifetime
