High-precision

Saw blade bending is reduced to a minimum thanks to an innovative saw blade guide. This means maximum cutting precision.

Smooth-running

Low vibrations for extremely smooth running. This makes it easier to handle the machine and increases the precision of the cut.

Compact

The compact, light design with a small handle circumference enables optimal control of the saw.

User-friendly

Fast and easy: No additional tools are required for changing the saw blade or adjusting the magnesium base plate.

3-year warranty

During this period, all manufacturing or material defects will be repaired free of charge.
