

ZEBRA Multi-Component T-Handle

The optimal tool for comfortable and efficient working.

High-quality blade

- Matte chrome-plated hexagonal blade for optimal corrosion protection and long service life.
- High-quality special steel provides optimal ratio of deformability and wear resistance.

With Black Point power take-off tip

- More torque and more precise fit.

Integrated side power take-off

- Allows effortless tightening and undoing of screw connections.
- Particularly well suited for rusted-in and stuck screw connections.

Multi-component handle with hard core and soft shell

- Extreme-grip black special plastic assures highest transmission of torque.
- Guarantees secure hold and rigidity owing to design with hard core and soft shell.
- The ergonomically designed handle is comfortable to hold, assuring fatigue-free working.
- With integrated hole for storage on a tool panel.

Through blade

- Withstands even the highest loads.
