Used to sand fillers, old paints, HS top-coat paints, water-based paints, new-part factory primers, plastic parts and composite fibre materials (e.g. GFRP).

### Polyester film backing

- Extremely high load capacity of abrasive even at edges
- No tearing of the disc
- Long service life

### Highly aggressive

High degree of material removal

### Very homogeneous sanding pattern

Very good paint condition

### Application area

Grain P40-P120

Initial sanding of new-part factory primers (KTL paints), sanding off old paint, sanding out stone-chip damage and rusty areas, sanding dented areas down to bare metal, pre-sanding of polyester and fine filler, levelling of filler edges.

Grain: P100-P500

Initial sanding of old paint during transition to new paint, matting of top-coat paints, sanding of plain paints, thermoplastic acrylic paints, clear lacquers, water-based paints, thick-film, primer, synthetic-resin and nitro fillers, spray filler, 2-component and MS filling primers, and reaction primers.
