

All-Purpose Gripper

Used for loosening and tightening bolts and nuts

- All-purpose tool for use as socket wrench insert from size 7 to 19 mm or size 13 to 32 mm.
- Replaces hexagon wrench, hexagon head and open-ended wrench.
- Saves an enormous amount of time and space.

Thanks to the 54 spring-loaded special pins, it can firmly grip squares and hexagons, Torx profiles, wing nuts and hook and eye screws.

Caution: This is an all-purpose problem-solving tool that may not be subjected to torques greater than the permissible maximum values. This tool is not a replacement for professional socket wrenches.
