

Waste Oil Collection Equipment

For quick and clean change of oil.

Art. No. 0715 93 90

- Receptacle can be swivelled and adjusted in height from 1400 – 1900 mm. Max. contents: 13 l.
- Receptacle comprises a holder to drain-off oil filters.
- Emptying by pressure buffer (0.5 bar).
- External control pipe for oil contents.
- Receptacle comprises a tap so the used oil can be tested.
- 2 swivel wheels.
- With removable small parts bin.
- Receptacle capacity: 90 litres.
- Dimension of the waste oil bin \varnothing 580 x 300 mm.

Scavenging Equipment

For mobile service, complete with 7 suction pipes.

Art. No. 0715 93 91

- Extraction by vacuum.
- Transparent suction head allows for optical control of the state of waste oil.
- Due to build-up of maximum vacuum the oil can be sucked off from several cars consecutively (max. 40 litres).
- Evacuation: by pressure buffer 0.5 bar.
- External control pipe for quantity of oil.
- 2 swivel wheels and removable small parts bin.
- Direct connection without suction pipe on all Mercedes Benz vehicles for direct suction from the oil dipstick shaft.
