

ICSS 300-P MARKING SET

Accessories for marking stainless-steel and aluminium components with a special template.

Art. No. 0984 800 01

P. Qty. 1

With this template produced on customer request, all types of names, company logos, addresses, serial numbers and lot numbers can be engraved on the surface of the material. The marking pads may only be used in conjunction with the Marking Handle. Marking pads are not suitable for cleaning and polishing.

Two kinds of marking are possible:

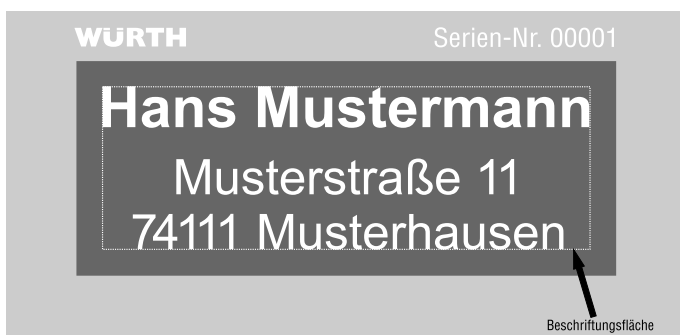

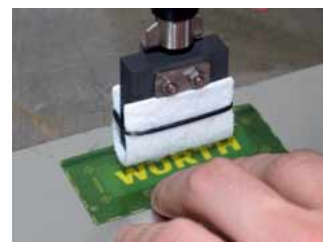

1. Black marking → similar to laser engraving (dark lettering)
2. White marking → similar to sandblasting (light lettering)

Attention!

Not suitable for stainless steel AISI 430
