

## VDE CABLE CUTTERS IEC 60900

### For cutting copper and aluminium cable

- For working on live parts up to 1000 volts (AC) and up to 1500 volts (DC), observing all prescribed safety precautions
- High-quality tool steel ensures long tool life and precision of cutting surfaces
- Special blade geometry facilitates easy and distortion-free cutting action through single or multi-stranded cable
- 1-component comfort handle with wide VDE collar for secure working

Cutting: hardened, precision cutting edges

Surface: ground and chrome-plated

Joint: bolted and adjustable
