

## COMPRESSED-AIR BLOW-OUT PEN

### Area of use:

For the targeted cleaning of cylinder heads, brakes, aluminum rims, tools and other parts soiled by loose residue.

### With affixing clip

#### Adjustable flow-through rate

Air flow is regulated by twisting the pen. The nozzle diameter of 3 mm enables a max. flow-through of 360 L/min at 6 bar.

#### Small and handy

Only 119 mm long.

#### Direct connection possible

Integrated coupling plug (7.2 mm) enables direct connection to a compressed-air coupling.

#### Rugged design

Duraluminum housing with Perbunan gasket.
