Content:

- 1 terrace construction clamp (incl. terrace clamping jaws)
- 2 universal clamping jaws – for use as a versatile single-handed clamp

SPACER

Art. No. 0907 000 101
 P. Qty. 10

Together with the terrace construction clamp, the ideal tool combination for the easy and precise alignment and assembly of terrace boards.

- Always the same spacing (6 or 8 mm) for a perfect appearance
- Even bent and warped boards can be aligned with no problem for easy assembly
- A perfect finish for any timber terrace

TERRACE CONSTRUCTION CLAMPING JAWS

Art. No. 0714 662 452
 P. Qty. 2

- Suitable for Würth single-handed clamps
 Art. Nos. 0714 662 450 and 0714 662 700

UNDERLAY PADS FOR THE SUBSTRUCTURE

Art. No. 0907 000 110
 P. Qty. 50

Size 90 x 90 x 10 mm

The underlay pads provide structural timber protection and extend the life of the terrace.

- The pads create a space between the foundation and the substructure
- Serve as support points for the substructure
- This prevents a build-up of moisture and premature timber rotting
